

The purpose

2a. The purpose of gaming or the Xbox one and other console is to give people the experience of what a digital moving platform looks like. People of all ages boys, girls, men, women can play what's called a video gaming. A videogame is a game played by electronically manipulating images produced by a computer program on a television screen or other display screen(Google dictionary). The reason that I'm talking about video games and not the Xbox One is because the games makes what's called a console. It goes both ways, what makes a video game without a console and what makes a console without a videogame, but enough talking about gaming let's talk about a Xbox One.

Pros

The pros about the Xbox One is not just a console just for gaming, you can also use apps like "Youtube, Netflix, Skype, Twitter etc". You can communicate with people and friends through Skype or the Xbox party system. Enjoying the content it brings to the communicate. The Xbox is created by a worldwide company call "Microsoft". In addition, the Xbox also have display is a Blu-ray Drive. So you can enjoy all movie you wish to watch.

Cons

The cons about the Xbox One is that it will cost \$189.99 maybe lower or higher, it depends what you're getting
